Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on May 10, 2006 has been entered.

DETAILED ACTION

This application filed January 25, 2002, is a divisional of 09/347,311, filed July 2, 1999.

Applicants amendment filed October 20, 2005 has been received and entered. Claims 1-12, 30-53 have been canceled. Claims 25, 28 were amended. Claims 13-29 are pending.

Election/Restrictions

As indicated previously Groups I-III were rejoined.

Claim 1-41 are currently under examination as they are drawn to a micro-organism comprising an expression vector that when expressed produces double stranded RNA and to use of said product in a method for reducing the expression of a gene of interest in *C. elegans*.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1632

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Information Disclosure Statement

The request to consider the IDS filed is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Fire *et al.* (May 12, 1998) as evidenced by Fire *et al.* (Nature 391:806, 1998 cited in abstract and of record).

Fire *et al.* disclose a method down-regulating gene expression in *C. elegans* by allowing the Fire *et al.* to feed on bacteria that produces a double stranded RNA. The bacteria strain used was BL21/DE3 and had alternative promoters for expression of the dsRNA, the Lac and T7 polymerase promoters.
